It contains key information about the project, including its objectives, main products and services, technological foundation, economic model, ICO plan, fund distribution, and a call to action. This annotation offers a summary of the project's key aspects, facilitating understanding of its essence and attracting the attention of potential investors and participants.

One Pager

Overview:

SLON PLUS introduces the Slon Share (SLS) token, an innovative investment instrument that combines the functionalities of a company share and a utility token. This opens up new opportunities for investors and users of the SLON PLUS platforms.

Mission:

To create a unified international ecosystem for borderless business by developing a network of web portals - e-commerce marketplaces with automatic translation into the user's language and unified registration.

Products:

- slonbuy.com - international universal classified ads board
- slonpet.com - thematic classified ads board for pet trading
- slonbid.com - international universal online auction
- slonshops.com - universal marketplace
- ekzotkazoo.com - official website of the company's flagship store, a marketplace for pet shops
- artlabaz.com - official website of the company's flagship store, a marketplace for trading artworks and antiques with auction functionality
- slonweb.com - Web Design Studio

Technologies:

Utilization of artificial intelligence and other advanced technologies for user convenience on the company's websites.

SLS Token:

- Issued on the TRON blockchain
- Compatible with third-party wallets
- Low transaction fees
- High transaction processing speed
- Provides investors with the opportunity to own a share of the SLON PLUS company.
- Offers the ability to purchase services and some goods at a 50% discount

ICO Details:

- Token price in the first stage of the ICO: 1 SLS = \$0.25 (75% discount)
- Accepted currencies: BTC, TRX, ETH, USDT, XRP, BNB / USD, EUR
- Minimum purchase: 100 SLS.

Fundraising Goals: Funds raised during the ICO will be allocated towards technical enhancement, scaling, and international expansion of the company's web portals, as well as legal support for the project.
